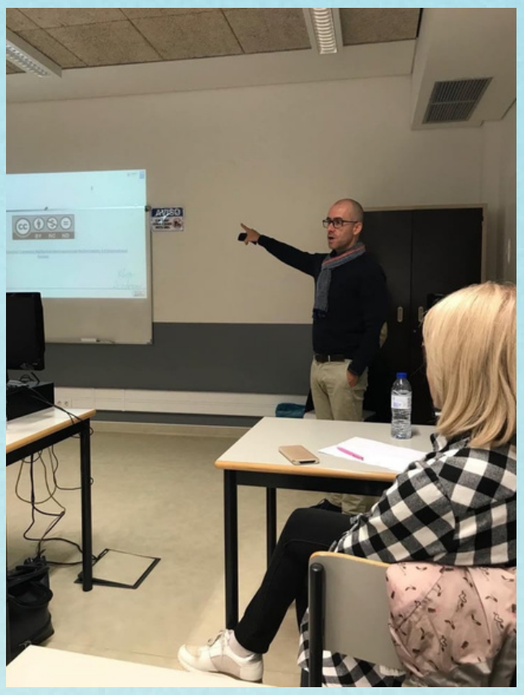
I Mobility
Teacher Training on Web 2.0 tools in Portugal
24th - 30th November, 2018.

The purpose of mobility:

1. To learn to use Web 2.0 tools, Coding and integrate them into the lessons.
2. To develop their language skills.
3. To learn and see the culture, history and touristic places of the host country.
4. To develop participants' ability to work in a team.

The training was about Web 2.0 tools. One of ICT teachers at Portuguese partner school gave trainings on these tools. He showed participant teachers how to use and integrate these Web 2.0 tools into their classroom activities. 3 teachers from each partner school took this training.The training lasted 5 days.

In their free time, the participants also had the opportunity to get to know the local community, visit the school in Vila Nova de Castela, enjoy the sandy beach of Manta Rota, which is full of tourists at any time of the year, and get a taste of the salty ocean by skippering small fishing boats. The teachers visited the medieval Castro Marim Castle and were transported for a short time to the fortress life of the time. Guests experienced an indescribable feeling of being directly involved in the history of the castle, taking on the roles of the medieval inhabitants.


Moments in Portugal...
